Ishaputra Botanicals: what we need from you

Your online shop is built and running on our preview site. To move it to your own domain and start taking real orders, we need the items below. Tick them off as you send them. You can send them in any order, but the items marked **(first)** let us start testing sooner.

Keeping your accounts safe: please never send passwords or secret keys by email or WhatsApp. For Razorpay, Cloudflare and Meta, the safest way is to **add us as a team member** on your account (our email: thedreamteamservicespvt@gmail.com). You stay the owner and can remove us at any time.

Step 3: your accounts and real content

Business details

- [ ] **(first)** Legal business name
- [ ] **(first)** Shop address, phone number, email and opening hours (the preview shows sample ones)
- [ ] **(first)** Your domain name (for example ishaputra.com), and who manages it. We'll need you, or whoever manages it, to add a few records we send you, or give us access.
- [ ] WhatsApp number customers can message you on
- [ ] WhatsApp number where you want new-order alerts
- [ ] GSTIN (it prints on every invoice)
- [ ] Licence numbers you want shown on the site or invoices, if your products need them (for example an AYUSH or FSSAI licence)
- [ ] Social media links (Instagram, Facebook, YouTube), if you want them on the site
- [ ] Vector logo file (SVG or AI), if you have one
- [ ] Email addresses of the people who should manage the shop (the admin login)

Accounts to create

- [ ] **(first) Razorpay** (payments): a business account. Add us as a team member. We start with test mode and switch to live payments at launch.
- [ ] **(first) Cloudflare** (product images): a free account is enough to start. Add us as a member.
- [ ] **WhatsApp Business (Meta)** (login codes and order updates): a Meta business account, and a phone number that is **not** already used on the WhatsApp app. Add us as a partner or employee; we set up the message templates.
- [ ] **Google sign-in screen:** the name, logo and support email customers see when they sign in with Google.

Real products

- [ ] Product list: names, prices, descriptions, ingredients, sizes and stock
- [ ] Real product photos (the preview uses sample photos with made-up label text)
- [ ] One photo per category (two categories share one now)
- [ ] Home page banner photos, if you have them

- [ ] Confirm the categories: Energy & Vitality, Hair Care, Skin Care, Personal Care, Ayurvedic Essentials, and their sub-categories
- [ ] Which products are really "New arrivals"
- [ ] Product videos for the site's video section, if you have any (it stays hidden until then)

Decisions on the values we filled in for you

Everything below is a sample value. The site works with it, but nothing goes live until you confirm or change it.

- [ ] **GST:** the rate for each product type (Ayurvedic medicines and cosmetics can differ), whether your prices include GST, and whether the bill shows a GST line.
- [ ] **Delivery:** you ship from Telangana. Tell us the delivery charge inside Telangana, the charge for other states, and the order value above which delivery is free.
- [ ] **Returns:** a 7-day return window. Please read the return, replacement, shipping, privacy and terms pages and tell us what to change.
- [ ] **Loyalty points:** how many points per ₹100 spent, what one point is worth, how many days before new points can be used, and the most of a bill that points can pay.
- [ ] **Loyalty levels:** Silver from ₹0 (normal points), Gold from ₹5,000 (1.25x points), Platinum from ₹15,000 (1.5x), Premium from ₹30,000 (2x). The spend counts what a customer paid online on delivered orders. Confirm the names, amounts and multipliers, and whether any level should give something extra. **Please confirm before launch:** the levels apply to every existing customer as soon as the site goes live.
- [ ] **Scratch & Win** (switched off until you say yes): one scratch card per delivered online order of ₹499 or more; prizes of 5, 10, 25 or 50 points; cards expire 30 days after delivery. Right now every card wins something (about 13 points a card on average). Tell us your monthly prize budget and whether some cards should win nothing.
- [ ] **Dealer membership** (switched off until you say yes): shops and salons apply on the site and you approve them. Approved dealers get 20% off orders worth ₹2,000 or more. Dealer orders can't use coupons or points and don't earn points. Confirm the discount and the minimum, whether some products need their own dealer price, which business types can apply (retail shop, Ayurvedic store, salon, gym, online seller, distributor, other), and the wording on the dealer page.
- [ ] **Claims on the site** to confirm or remove: "24 h support" / "reply within 24 hours", "100% secure", "insured delivery", "wellness experts", "video consultation with an expert".
- [ ] **Customer reviews:** send real customer reviews (with their permission), or we remove the 3 sample ones.

Step 4: we test everything on your domain, then send you the link

You only need to answer our questions here. We test sign-up and login, the WhatsApp login code, notifications, cart, coupons, points and wallet, a Razorpay test payment, order messages to you and the customer, every order status, returns and cancellations, invoices (with your name and GSTIN), image uploads, link previews on WhatsApp, and the loyalty card, Scratch & Win and dealer features.

- [ ] Check the site on your phone and your computer, and send us one list of changes.

Step 5: your changes, then public launch

- [ ] Send feedback in rounds; we log each round and apply it.

- [ ] Give the final OK to go public.

At launch we:

- remove all sample data;
- switch Razorpay to live payments;
- switch WhatsApp messages to live, once Meta has approved all the message templates.
